LCACP Exam Prerequisites

LCACP exam candidates must first have their prerequisites tested and approved. Candidates must indicate which of the following streams they consider themselves to comply with (this may be more than one stream), and submit the required evidence accordingly. LCACP exam prerequisites will only be assessed by ALCAS after payment for the prerequisite assessment has been received.

Prerequisites may be met by any one of the following:

1. Degree: in LCA at the undergraduate or graduate level (submit copy of diploma/degree).
2. Degree: in environmental science or environmental engineering (submit copy of diploma/degree) PLUS a 3+ month LCA internship or externship (submit letter from the employer) OR participation in an LCA (submit copy of LCA study).
3. Tertiary education level class work: classes or coursework that include the following essential skills (submit a copy of transcript):
   - General Chemistry
   - Statistics
   - Economics
   - Systems analysis or systems dynamics
   - Environmental Toxicology

   PLUS a 3+ month LCA internship or externship (submit letter from the employer) OR participation in an LCA (submit copy of LCA study).
4. Experience: LCA skills gained through experience (submit an LCA that is either critically reviewed or published in a peer-reviewed journal, showing the applicant as a listed author).

Submission of all materials verifying the prerequisites must be completed by no later than one month before the planned exam date and emailed to info@alcas.asn.au.

ALL SUBMITTED MATERIALS ARE KEPT CONFIDENTIAL.
